2.	the standpoint of equipment, in East Germany and could, utilize its capacity to the fullest extent. This is not because of the prevailing shortages of material and per 1958, not one of the development projects planned for 1 Production is hampered by shortages of material. For econtract for sprocket wheels, let to the VEB Walzwerk (Brandenburg, was completely unsatisfactory. Because the wheels received from Brandenburg were defective, Ludwig manufacture substitutes after normal working hours; the hand at Ludwigsfelde, however, was not suitable for this be processed before it could be used. With a material the over-all loss to the Ludwigsfelde plant was consided. There are increasingly serious shortages in personnel. There are increasingly serious shortages in personnel are being transferred to production departments. As of was one white-collar employee for every two factory work increase this ratio to one white-collar worker for four workers, but there seems little likelihood of this being near future.  Officials of the Ludwigsfelde enterprise, as of early Material Director  Assistant Plant Director  Schuerer (fnu)  Pruehss-	t feasible, however, sonnel. As of early 956 had been completed. 25X1 xample, a sub-rolling mill) e sprocket sfelde had to material on s job and had to loss of 10 tons, rable.  Nontechnical workers early 1958, there early 1958, there early it is hoped to factory g carried out in the
